Pressure-Sensitive Mounting Materials with Adhesives on Double Sides or Single Side

	Color	Thickness	Adhesive (Graphic side/Substrate side)	Size*	Features			
_								
X-500	-	_	High tack	43 x 164	Adhesive only, with no base material. The adhesive is high tack.			
Polyester film								
E-430ZW	White	10.0 mil	High tack	43 x 98	$10 \text{mil} (250 \mu\text{m})$ thick polyester film, for mounting-the-substrate use. Suitable for use with pictures.			
				49 x 98				
				53 x 98				
E-433ZC	Clear	10.0 mil	High tack	43 x 98	Clear version of "E-430ZW", for mounting-the-substrate use. The clarity also enables the film to be used as a laminating film.			
				49 x 98				
E-432ZW	Translucent white	3.0 mil	High tack	43 x 98	Translucent-white, 3 mil $(75\mu$ m $)$ thick polyester film, for mounting-the-substrate use. It also can be used with tapestries and illuminated signs.			
				49 x 98				
				53 x 98				
Synthetic paper								
Y-450ZW	White	3.2 mil	High tack	43 x 98	Synthetic paper, for mounting-the-substrate use. Suitable for use with tapestries.			

- * Size: Inches x Feet
- Some factors such as the period of application, the specific characteristics of the substrate, etc., can cause the adhesive residue on the substrate after removed.
- The characteristics of some substrates, such as certain plastics, tent fabrics, and expanded materials may cause expansion.
- For LAG MOUNT W items, basically the graphic side is the inner side of a roll, but only for P-352ZW the graphic side is the outer side of a roll.
- \bullet For special applications, please consult with your sales representative in advance.
- There are more items available other than the above mentioned items.
- LINTEC reserves the right to change product specifications without notice.
