

Wallcoverings become made-to-order in the Digital Printing Era

LINTEC Corporation has long been a producer of fire retardant media for industrial applications. We have leveraged this capability into producing a textured, fireproof ink jet printable wall covering media. PRINTERIOR is also completely recyclable as opposed to traditional PVC based wall covering media.

We recommend that PRINTERIOR media be printed with water based pigment inks. For a list of recommended machines please contact LINTEC of America.
